Objective

Seeking a challenging tech job that can take my interim internship experience to the next level.

Education

Park City High School (graduated May 2013)

University of Utah (2013 - present) – Senior in Computer Science.

CS electives:

- **CS 4530** (Mobile Programming)
- **CS 4960** (Foundations of Data Analysis)
- **CS 5140** (Data Mining)
- **CS 4480** (Computer Networks)
- **CS 5460** (Operating Systems)
- **CS 5530** (Database Systems)

Experience Highlights

- Full stack web developer intern at Navitaire (May 2017 – present).
 - o Ability to contribute to enterprise-scale software.
 - o Coordination and communication with a large a team of developers.
 - o Extensive automated REST API testing.
 - o Extensive C# and Angular2 web/networked programming.

Skills

- Web technologies HTML5, CSS3, JavaScript.
- Over 3 years of experience developing on macOS, Windows, and Linux.
- Familiarity with modern software development strategies and processes.
 - o Agile and Scrum group software development methodologies.
 - o Unit, regression and automated testing in CICD environments.

Summary

My experience at the University of Utah has fostered my appreciation for abstraction and lifelong learning. Paired with my professional experience as a web developer intern, I have great confidence in my ability to be both an asset wherever I am employed and a sociable and integrated player within any work environment.
